

Your Spectrum Lasik eye care professionals: Dr. Eric Brown and Dr. Joe Parisi.

## It's About Results

"My friend and co-worker went to Spectrum and talked about what a great experience she had there," says Kathy Lee Jones, sales manager at a local media company. "I had another friend who went somewhere else. She had a terrible experience with bad results, so I went with Spectrum. From the minute I walked out the door from my Lasik procedure, my vision was perfect."

Dr. Eric Brown, optometrist, and Dr. Joe Parisi, eye surgeon, are the medical team who took care of Ms. Jones. Together, they assess and treat all patients at Spectrum Lasik.

"Dr. Brown and I work very closely with our Lasik patients through their screening, surgery and post-Lasik follow ups. We think it's really important that patients be well informed and comfortable in our care, and that we provide them with the very best visual outcomes," says Dr. Parisi.

Drs. Brown and Parisi both live with their families in the Greenville area, and Spectrum Lasik is a Greenville-based company that's been treating patients to excellent vision for 14 years.

Both doctors have extensive experience, having performed thousands upon thousands of laser eye and refractive procedures, with virtually all of their Lasik patients enjoying 20/20 vision as a result.

It really comes down to the experience of the eye doctors and the technology they use.

"We use the most advanced laser refractive

We think it's really important that patients be well informed and comfortable in our care, and that we provide them with the very best visual outcomes.

system available today," says Dr. Parisi. "Some centers offer older technology and somewhat lower prices. But the newer technology we use solves problems that earlier technology simply couldn't such as dry eye, astigmatism and night vision issues. We invest in the best technology because it gives our patients the best visual results."

Spectrum Lasik offers free consultations, competitive pricing and flexible financing. So, if you'd like to get rid of your glasses and contacts once and for all, they are the local provider of choice. "When Dr. Parisi explained the procedure to me," says Ms. Jones, "it didn't seem so big a deal. Nothing at all to be scared of – and I'm kicking myself for not doing it earlier!"
